0. How to start

From the repository root, start the API and all three portals:

```
npm run dev:backend
npm run dev:admin
npm run dev:manager
npm run dev:employee
```

App	URL
Admin portal	http://127.0.0.1:3000
Manager portal	http://127.0.0.1:3001
Employee portal	http://127.0.0.1:3002
API health	http://127.0.0.1:5000/api/health

Use a **weekday** for leave and attendance cases unless the case says weekend. Today's sample dates assume August 2026 (Tue 18 is a weekday; Sat 22–Sun 23 is weekend).

Demo accounts

Pass	Role	Email	Password	Employee ID	Portal
☐	Admin	admin@appinop.com	Admin@123	ADM001	:3000

11. Suggested test order

1. Login matrix (section 1)
2. Employee leave apply (2.1) → check both emails (section 3)
3. Manager approve from **email**, then a second leave from **portal** (section 4)
4. Admin override that manager decision (section 5)
5. Weekend leave blocked (2.5)
6. Attendance check-in/out (section 6)
7. Tasks, hire request, and search (sections 8–10)
